Android Developer

DRAGON ARMY

At Dragon Army, our team is the most important part of our company. And our values are what help us make sure we bring in the right new team members. They are: Team First, Think Positively, and Have Fun. So right off the bat, we need to know if you think these are good values for YOU. If this sounds like your kind of thing, keep reading.

We're a mobile experience company. We strive to build remarkable mobile products and experiences for Fortune 1000 companies. And we're looking for an incredible Android Developer to join our growing team.

Responsibilities

As an Android Developer, you are on top of mobile trends and stay up-to-date on the latest Android releases and updates. You also have a solid understanding of backend systems and how to work closely with a backend team. You design, build, and maintain applications while collaborating with a team maintaining code quality.

Required Skills and Experience

- 2+ years of Android development experience
- Experience in consuming backend REST APIs
- Uses Android studio and the Gradle build tool
- Good knowledge of the Android SDK
- Understands the Activity and Fragment lifecycle
- Understanding and usage of basic tools (Git, Debugging, LogCat)
- Excellent collaboration and communication skills
- A passion for building apps!

Sound like something you'd be into? Drop us a line at **jobs@dragonarmy.com** and we'll get back to you.
